KWAME NKRUMAH UNIVERSITY OF SCIENCE AND TECHNOLOGY, KUMASI

MACROSCOPIC TRAFFIC FLOW MODEL

BY

GABRIEL OBED FOSU

A THESIS SUBMITTED TO THE DEPARTMENT OF MATHEMATICS, KWAME NKRUMAH UNIVERSITY OF SCIENCE AND TECHNOLOGY IN PARTIAL FUFILLMENT OF THE REQUIREMENT FOR THE DEGREE OF M.PHIL APPLIED MATHEMATICS

JUNE 2015

DECLARATION

I hereby declare that this submission is my own work towards the award of the M. Phil degree and that, to the best of my knowledge, it contains no material previously published by another person nor material which had been accepted for the award of any other degree of the university, except where due acknowledgment had been made in the text.

CHAPTER 1

INTRODUCTION

In this paper, we consider inventory model for time-dependent deteriorating items with trapezoidal type demand rate and partial backlogging (Fosu et al., 2021).

1.1 Background

Trap....

1.1.1 Let Try

1.2 Problem Statement

CHAPTER 2

LITERATURE REVIEW

Density : ρ is the average number of vehicles on a given length of road.

CHAPTER 3

METHODOLOGY

3.1 2022

The LWR model is given as (Appati et al., 2015):

$$\rho_t + q_x = 0 \tag{3.1}$$

where ρ is the density q is the flow

CHAPTER 4

ANALYSIS

Fosu et al. (2020) for beginning sentences and in-text referencing.

CHAPTER 5

CONCLUSION
